## PROJECTS

### Lettuce Talk | [Link](#)

This food tracker app allows an individual to track the nutrition of the foods they eat, search for recipes involving the foods they're craving, and search for nearby locations of grocery stores with those items available.

- Tools used: javascript Bulma CSS HTML Bing API JQuery

### Access Tennessee Role in Full Stack - [Link](#)

Access Tennessee is an app that strives to make this state more accommodating and accessible to all people. By giving individuals the chance to rate and directly interact with businesses in the community about what accommodations are needed for specific types of impairments/ disabilities

- Tools used by me for this project: JavaScript, jQuery, Node, Express, Heroku, HTML, CSS, and Bootstrap

### Hanzai Watchers | [Link](#)

Hanzai Watchers or Crime Watchers is an application made with React on the frontend and MongoDB on the backend that allows users to connect with other users around the world about crime information in their area.

- Tools used : React.JS, Redux Library, Bootstrap, HTML/CSS, Node.JS, Express.JS, MongoDB, Mongoose

## Technical Skills

Frontend: JavaScript, jQuery, APIs, React, HTML, CSS, SASS, and Bootstrap

Backend: Node, Express, MySQL, MongoDB, Python, Handlebars, Firebase, RESTful, AWS, and Java
